

Full Grain Leather Floors and Panels

Element7's full grain leather floors not only offer the luxury of a totally natural floor covering, they also deliver an absolutely stunning and utterly inimitable look for a fashion showroom, master bedroom, dressing room or study. Leather floors are durable, elegant, and always in fashion. Uniquely, they get better with age, developing a saddle-worn patina, their constantly changing character simply confirming the quality of the full-grain leather.

Cleaning & Care	Beeswax is the natural and correct way to maintain a leather floor. The floor should be waxed immediately after installation, and then two to four times a year depending on use

Full-grain leather is pure untouched, unadulterated leather. It is internationally recognised within the leather trade that the finest full-grain leather hides in the world are to be found in England; the very best are known as 'Number 1s'. It is exclusively these Number 1 Ox hides that are used in the production of an Element7 leather floor.

Element7 full grain leather floors are available in a range of colours. The colouring process of aniline dyeing the hides is a very lengthy process and it allows the colour to penetrate right through the hides completely.

Our finished hides are fully bonded to completely stable engineered wood backing boards. They incorporate the same proven wood engineering technology as our wide-plank floors. The leather is glued and pressed onto the board in a controlled factory environment using pressurised presses. This means that the leather will never bubble or curl up at the edges.

EXCEPTIONALLY ENGINEERED WOOD FLOORING
